**CELEBREX (Celecoxib): Treats mild to moderate Pain and help relieve symptoms of Arthritis (osteoarthritis, rheumatoid arthritis, or juvenile ... Swelling, Stiffness, and Joint Pain** James Lee Anderson

“Although, your health condition may impact your everyday life, do not let it define who you are.”

CELEBREX (Celecoxib) is used to relieve pain, tenderness, swelling and stiffness caused by osteoarthritis (arthritis caused by a breakdown of the lining of the joints), rheumatoid arthritis (arthritis caused by swelling of the lining of the joints), and ankylosing spondylitis (arthritis that mainly affects the spine). It is also used to treat juvenile rheumatoid arthritis (a type of arthritis that affects children) in children 2 years of age and older. CELEBREX (Celecoxib) is also used to treat painful menstrual periods and to relieve other types of short term pain including pain caused by injuries, surgery and other medical or dental procedures, or medical conditions that last for a limited time. Celecoxib is in a class of NSAIDs called COX-2 inhibitors. It works by stopping the body's production of a substance that causes pain and inflammation. Thanks and may you have a good understanding about this drug—CELEBREX (Celecoxib). You may want to share this book with your family and friends who may be in need of help and would want to use this medicine. Take care, and as always, be well!
