**Women's Primary Health Care: Office Practice and Procedures** Vicki L. Seltzer (Editor), Warren H. Pearse (Editor)

This work provides the primary care physician - obstetrician/gynaecologist, family practitioner, and internist - with an all-encompassing review of office-based management of the full spectrum of disorders and conditions presented by the female patient. Pressure from insurance companies, the government, patient, and organized medicine itself now require that a women's primary care provider handle not only all obstetric and gynaecologic concerns, but also be skilled at delivering cost-effective management of other medical problems in the office setting. This text helps the reader develop the necessary skills to accomplish this.
