Fluorescent Methods to Study Biological Membranes (Springer Series on Fluorescence)

Fluorescent Methods to Study Biological Membranes (Springer Series on Fluorescence)

Biological membranes play a central role in cell structure, shape and functions. However, investigating the membrane bilayer has proved to be difficult due to its highly dynamic and anisotropic structure, which generates steep gradients at the nanometer scale. Due to the decisive impact of recently developed fluorescence-based techniques, tremendous advances have been made in the last few years in our understanding of membrane characteristics and functions. In this context, the present book illustrates some of these major advances by collecting review articles written by highly respected experts. The book is organized in three parts, the first of which deals with membrane probes and model membranes. The second part describes the use of advanced quantitative and high-resolution techniques to explore the properties of biological membranes, illustrating the key progress made regarding membrane organization, dynamics and interactions. The third part is focused on the investigation of membrane proteins using the same techniques, and notably on the membrane receptors that play a central role in signaling pathways and therapeutic strategies. All chapters provide comprehensive information on membranes and their exploration for beginners in the field and advanced researchers alike.

From reader reviews:

Jeffrey Dominguez:

The book Fluorescent Methods to Study Biological Membranes (Springer Series on Fluorescence) can give more knowledge and information about everything you want. Exactly why must we leave the good thing like a book Fluorescent Methods to Study Biological Membranes (Springer Series on Fluorescence)? Several of you have a different opinion about book. But one aim which book can give many details for us. It is absolutely appropriate. Right now, try to closer together with your book. Knowledge or data that you take for that, you are able to give for each other; it is possible to share all of these. Book Fluorescent Methods to Study Biological Membranes (Springer Series on Fluorescence) has simple shape nevertheless, you know: it has great and big function for you. You can look the enormous world by available and read a book. So it is very wonderful.

Salvatore Anthony:

The book with title Fluorescent Methods to Study Biological Membranes (Springer Series on Fluorescence) contains a lot of information that you can discover it. You can get a lot of benefit after read this book. This particular book exist new knowledge the information that exist in this publication represented the condition of the world right now. That is important to yo7u to find out how the improvement of the world. This kind of book will bring you in new era of the globalization. You can read the e-book on your smart phone, so you can read this anywhere you want.

Edward Johnson:

Reading can called head hangout, why? Because when you are reading a book particularly book entitled Fluorescent Methods to Study Biological Membranes (Springer Series on Fluorescence) the mind will drift away trough every dimension, wandering in each aspect that maybe unfamiliar for but surely can become your mind friends. Imaging every single word written in a e-book then become one type conclusion and explanation that will maybe you never get ahead of. The Fluorescent Methods to Study Biological Membranes (Springer Series on Fluorescence) giving you another experience more than blown away the mind but also giving you useful information for your better life in this era. So now let us demonstrate the relaxing pattern here is your body and mind will likely be pleased when you are finished studying it, like winning an activity. Do you want to try this extraordinary paying spare time activity?

Steven Atkins:

Beside that Fluorescent Methods to Study Biological Membranes (Springer Series on Fluorescence) in your phone, it might give you a way to get nearer to the new knowledge or info. The information and the knowledge you may got here is fresh from the oven so don't be worry if you feel like an previous people live in narrow community. It is good thing to have Fluorescent Methods to Study Biological Membranes (Springer Series on Fluorescence) because this book offers to your account readable information. Do you at

times have book but you seldom get what it's facts concerning. Oh come on, that wil happen if you have this inside your hand. The Enjoyable agreement here cannot be questionable, similar to treasuring beautiful island. Techniques you still want to miss it? Find this book as well as read it from currently!
