Smart Materials and Technologies: For the Architecture and Design Professions D. Michelle Addington, Daniel Schodek
Today, architects and designers are beginning to look toward developments in new "smart" or "intelligent" materials and technologies for solutions to long-standing problems in building design. However, these new materials have so far been applied in a diverse but largely idiosyncratic nature, because relatively few architects have access to information about the types or properties of these new materials or technologies. Two of the leading experts in this field - Addington and Schodek - have solved this problem by incorporating all the relevant information of all the latest technologies available to architects and designers in this one volume. They present materials by describing their fundamental characteristics, and go on to identify and suggest how these same characteristics can be exploited by professionals to achieve their design goals. Here, the wealth of technical understanding already available in the materials science and engineering literature is at last made accessible to a design audience.

From reader reviews:

Robert Hay:

The feeling that you get from Smart Materials and Technologies: For the Architecture and Design Professions will be the more deep you searching the information that hide in the words the more you get considering reading it. It doesn't mean that this book is hard to understand but Smart Materials and Technologies: For the Architecture and Design Professions giving you joy feeling of reading. The writer conveys their point in selected way that can be understood through anyone who read that because the author of this reserve is well-known enough. This specific book also makes your own personal vocabulary increase well. Therefore it is easy to understand then can go to you, both in printed or e-book style are available. We recommend you for having this specific Smart Materials and Technologies: For the Architecture and Design Professions instantly.

Glenn Remaley:

Do you one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Aim to pick one book that you never know the inside because don't evaluate book by its cover may doesn't work here is difficult job because you are frightened that the inside maybe not as fantastic as in the outside appearance likes. Maybe you answer can be Smart Materials and Technologies: For the Architecture and Design Professions why because the wonderful cover that make you consider with regards to the content will not disappoint a person. The inside or content will be fantastic as the outside or cover. Your reading sixth sense will directly direct you to pick up this book.

Susan Rogers:

Many people spending their time frame by playing outside using friends, fun activity having family or just watching TV all day long. You can have new activity to pay your whole day by reading through a book. Ugh, do you think reading a book can really hard because you have to take the book everywhere? It alright you can have the e-book, having everywhere you want in your Cell phone. Like Smart Materials and Technologies: For the Architecture and Design Professions which is having the e-book version. So , try out this book? Let's notice.

Michael Fischer:

As a college student exactly feel bored to help reading. If their teacher questioned them to go to the library or even make summary for some reserve, they are complained. Just very little students that has reading's spirit or real their hobby. They just do what the teacher want, like asked to go to the library. They go to there but nothing reading very seriously. Any students feel that reading is not important, boring and can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Smart Materials and Technologies: For the Architecture and Design Professions can make you

truly feel more interested to read.
