Caroline Joy Y Co PT

A Review of Current Research: Modalities, Myofascial Release, Stroke, Nerve Mobilization and **Proprioceptive Training** Caroline Joy Y Co PT

This book reviews the most current research on therapeutic modalities, myofascial release of the upper extremity, nerve mobilization, proprioceptive training and stroke rehabilitation. Why do we publish continuing education modules? Because even though there are a lot out there, a lot claiming that they provide evidence based studies, they don't. Most of the time, the research used are more than 20 years old."This is why we founded Rehabsurge, Inc. We choose a topic of interest for the rehabilitation professional. We review all the journals that pertain to that topic. We subscribe to major online libraries which contain peer reviewed journals. Then, we read each journal and summarize them into easy to read books. The cost of subscription to these journals are astronomical. Also, the time to read and review each journal takes so much time. This is our goal-- to provide the latest research to clinicians and to save clinicians' time.
