Loco-Motion: Physics Models for the Classroom Ed Sobey

Using the concept of "learning by doing," this classroom activity book contains an impressive collection of instructions and guidelines for building physics models that fly through the air, drive on the ground, or paddle through water. Students will use experimentation and analysis in these intriguing physics projects to inspire new and improve upon old designs. Each model is presented in a specific educational context, so teachers can instruct with hands-on experimentation. Students will explore science concepts such as gravity, air pressure, kinetic energy, Newton's laws, electrical circuitry, buoyancy, and inertia. Detailed materials lists and step-by-step directions for building models are structured so that the teacher becomes the director of research and development in a classroom of young engineers. The models discussed in the book include gravity-powered cars, balloon racers, hovercrafts, gravity ball launchers, flying saucers, catapults, chemical mini-rockets, swamp boats, and submarines. Kids are encouraged to test, modify, and redesign based on observation of their models in action, while working cooperatively and learning from one another's successes and failures. The engaging material in these activities promote the understanding of science not as a collection of facts to be studied for a test, but as a learning process to be actively experienced.

From reader reviews:

Mary Gale:

The e-book untitled Loco-Motion: Physics Models for the Classroom is the book that recommended to you to study. You can see the quality of the publication content that will be shown to you actually. The language that author use to explained their ideas are easily to understand. The author was did a lot of exploration when write the book, hence the information that they share to your account is absolutely accurate. You also can get the e-book of Loco-Motion: Physics Models for the Classroom from the publisher to make you considerably more enjoy free time.

Shelly Rodriguez:

Beside this kind of Loco-Motion: Physics Models for the Classroom in your phone, it might give you a way to get closer to the new knowledge or facts. The information and the knowledge you will got here is fresh from the oven so don't be worry if you feel like an previous people live in narrow small town. It is good thing to have Loco-Motion: Physics Models for the Classroom because this book offers for you readable information. Do you sometimes have book but you seldom get what it's exactly about. Oh come on, that would not happen if you have this in your hand. The Enjoyable arrangement here cannot be questionable, like treasuring beautiful island. So do you still want to miss this? Find this book and read it from right now!

Susan Jun:

Do you like reading a reserve? Confuse to looking for your preferred book? Or your book has been rare? Why so many concern for the book? But just about any people feel that they enjoy to get reading. Some people likes examining, not only science book but additionally novel and Loco-Motion: Physics Models for the Classroom or maybe others sources were given understanding for you. After you know how the good a book, you feel desire to read more and more. Science guide was created for teacher or maybe students especially. Those books are helping them to bring their knowledge. In additional case, beside science publication, any other book likes Loco-Motion: Physics Models for the Classroom to make your spare time far more colorful. Many types of book like this one.

Christopher Palmer:

What is your hobby? Have you heard this question when you got pupils? We believe that that query was given by teacher to their students. Many kinds of hobby, All people has different hobby. Therefore you know that little person such as reading or as examining become their hobby. You have to know that reading is very important and book as to be the thing. Book is important thing to provide you knowledge, except your own teacher or lecturer. You discover good news or update regarding something by book. Different categories of books that can you go onto be your object. One of them is this Loco-Motion: Physics Models for the Classroom.
