When a person picks up a metal part and clamps it in the chuck of a lathe, he begins with his arm, proceeds with his wrist and finishes with his fingers. The arm brings the part near the chuck. The wrist positions the part, giving it the proper orientation to slide in. After the part is inserted, the wrist and fingers make tiny corrections to ensure that it is correctly seated. Today's robot attempting the same operations is at a grave disadvantage if it has to make all motions with the arm. The following work investigates the use of robotic wrists and hands to help industrial robots perform the fine motions needed in a metal working cell. Chapters 1 and 2 are an introduction to the field and a review of previous investigations on related subjects. Little work has been done on grasping and fine manipulation with a robot hand or wrist, but the related subjects of robot arm dynamics and control have an extensive literature.

Well, probably you will need this Robotic Grasping and Fine Manipulation (The Springer International Series in Engineering and Computer Science).

Sabra Fitzgerald:

The book Robotic Grasping and Fine Manipulation (The Springer International Series in Engineering and Computer Science) can give more knowledge and also the precise product information about everything you want. So just why must we leave the good thing like a book Robotic Grasping and Fine Manipulation (The Springer International Series in Engineering and Computer Science)? Several of you have a different opinion about book. But one aim which book can give many details for us. It is absolutely correct. Right now, try to closer together with your book. Knowledge or data that you take for that, you could give for each other; you are able to share all of these. Book Robotic Grasping and Fine Manipulation (The Springer International Series in Engineering and Computer Science) has simple shape however, you know: it has great and massive function for you. You can search the enormous world by start and read a e-book. So it is very wonderful.

Aaron Williams:

Many people spending their time by playing outside along with friends, fun activity with family or just watching TV 24 hours a day.
